Bright TV

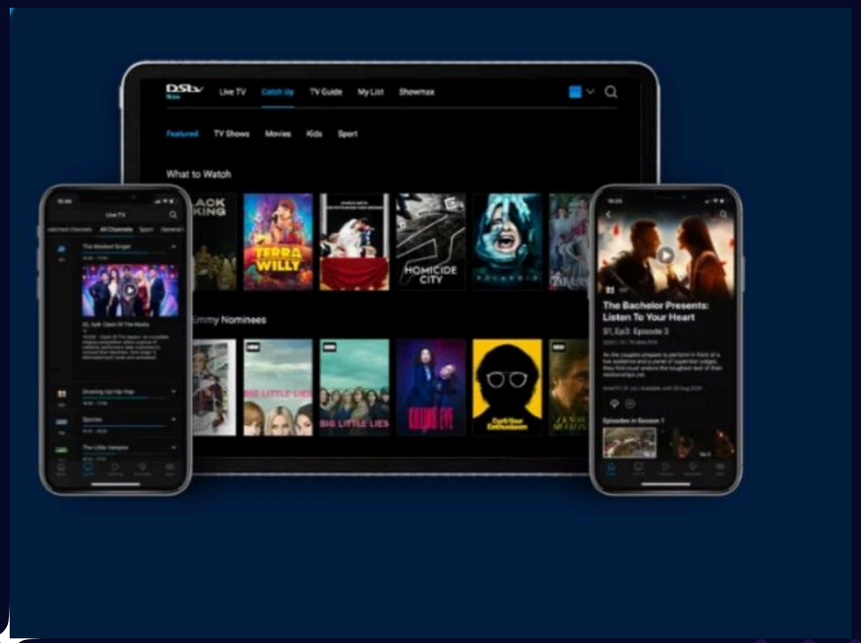
Agenda



- Introduction
- Overview
- Key consumption drivers
- User behavior insights
- Low-consumption gaps
- Recommendations to increase usage
- Growth strategy for user base
- Conclusion
- Q&A

Introduction

Today I'll be presenting an analysis of Bright TV's consumption patterns, focusing on the key factors that influence how users engage with the platform.

The goal of this analysis is to better understand user behavior, identify trends in content consumption, and uncover opportunities to increase engagement—especially during periods where usage is low.

By leveraging data-driven insights, we aim to not only improve overall consumption but also explore strategies to grow Bright TV's user base in a sustainable and impactful way."

Bright TV

Overview

"This presentation will cover three key areas: First, we'll explore the main factors that influence consumption, including time-based patterns and user behavior trends.

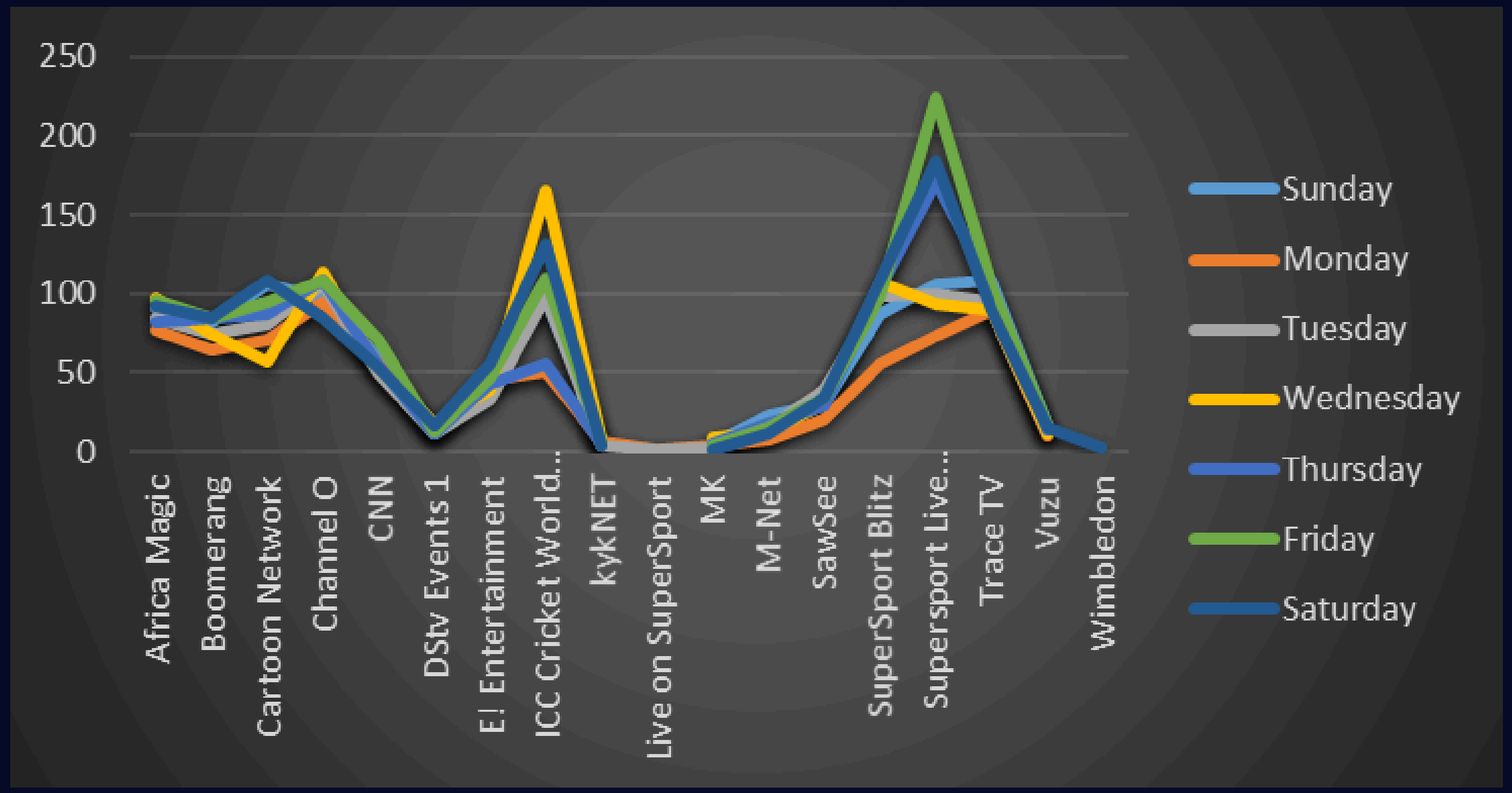
Next, we'll dive into insights around how different users engage with the platform, highlighting both high and low consumption periods.

Finally, we'll present targeted recommendations—focused on increasing engagement during low-activity periods and identifying strategic initiatives to expand Bright TV's user base.

The goal is to move from insights to action—ensuring that the findings translate into measurable business impact."

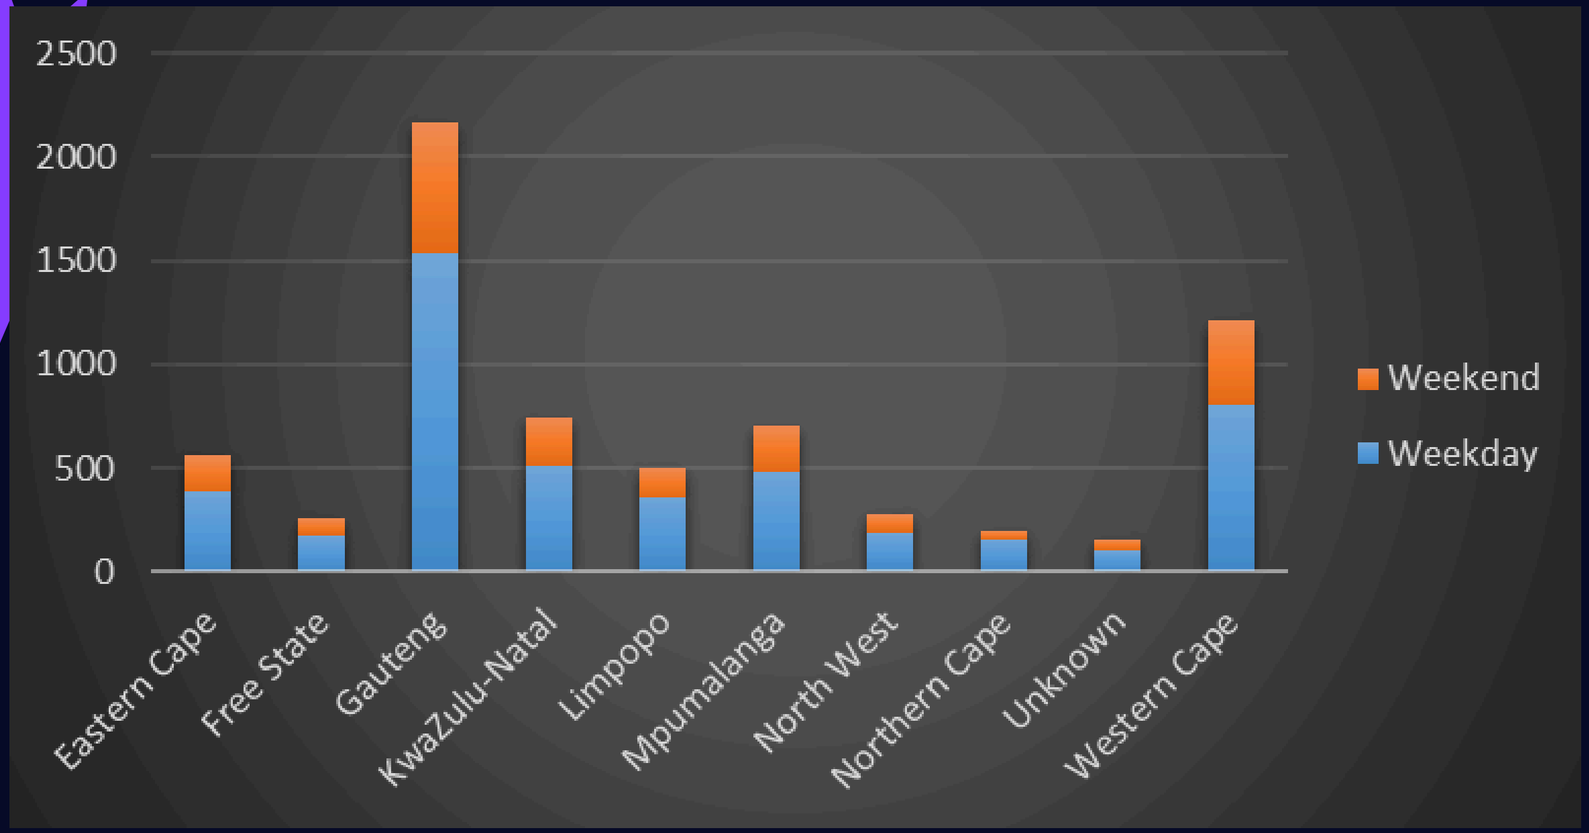
Overall Consumption Trends

- **Insighte:** The consumption increasing, by day/ week. Highlight the peaks and dips of viewers watching
- “Consumption spikes on Fridays, drops on Tuesdays and Wednesday ”.



Consumption by Day of Week

Insight: This is the revenue by day consumption in each province. “Weekends drive by 40% and 60% usage on weekdays”.



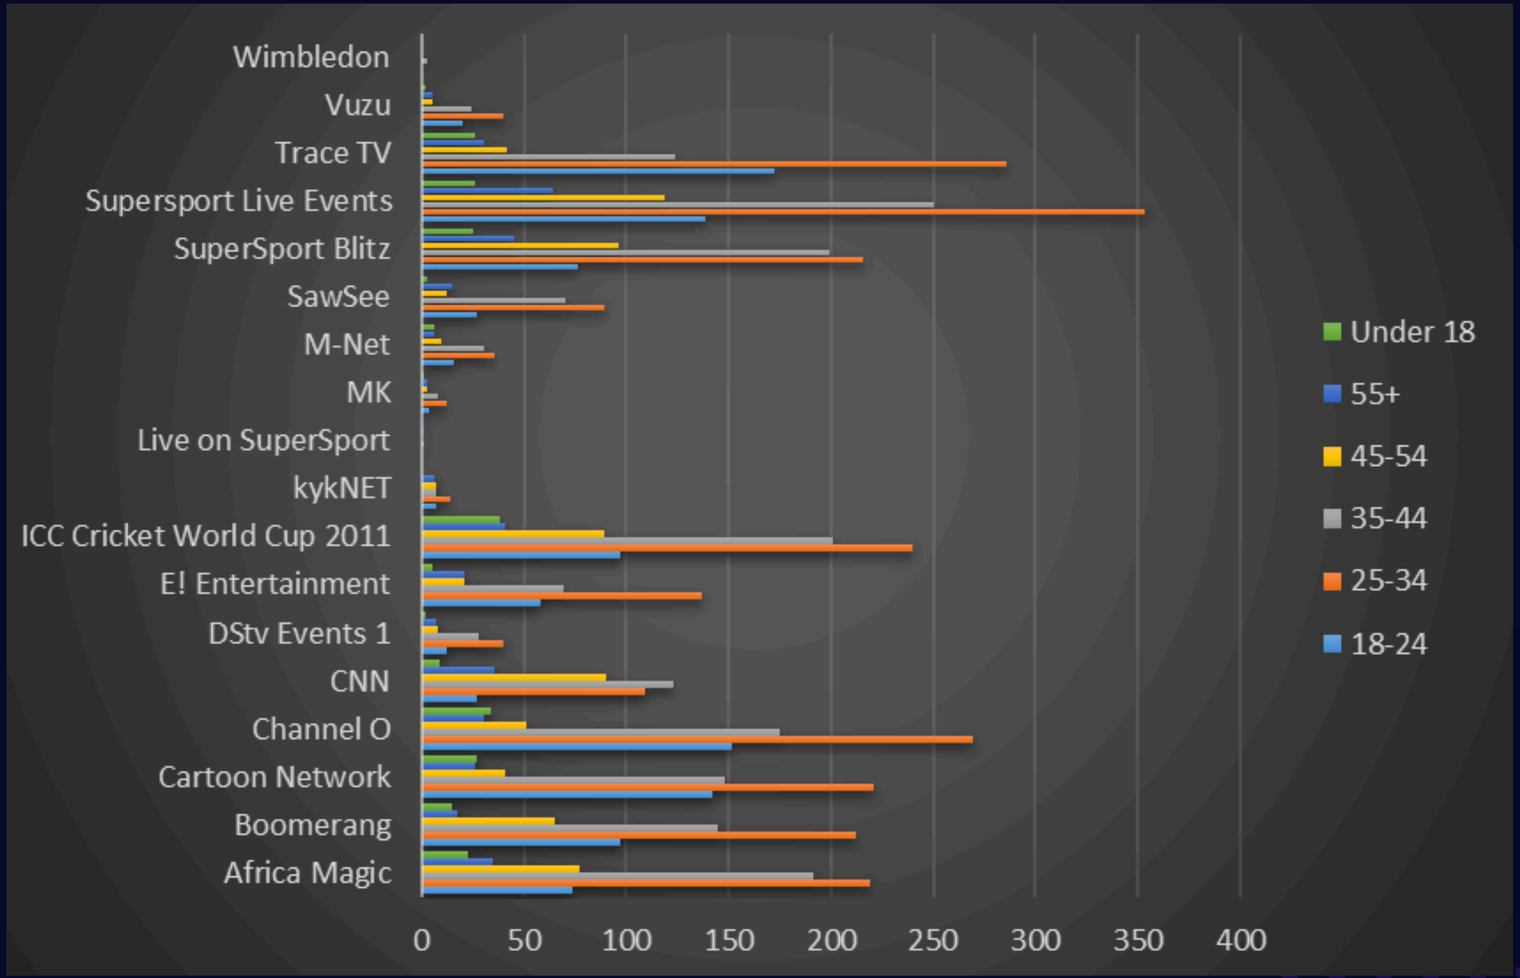
Consumption by Time of Day

Insight: This is the peak time that each gender consums by day. Peak hours = prime opportunity for engagement pushed.

	Afternoon	Late Night	Morning	Night	Prime Time
Female	257	100	131	122	225
Male	1880	814	910	779	1401
null	46	28	32	16	34

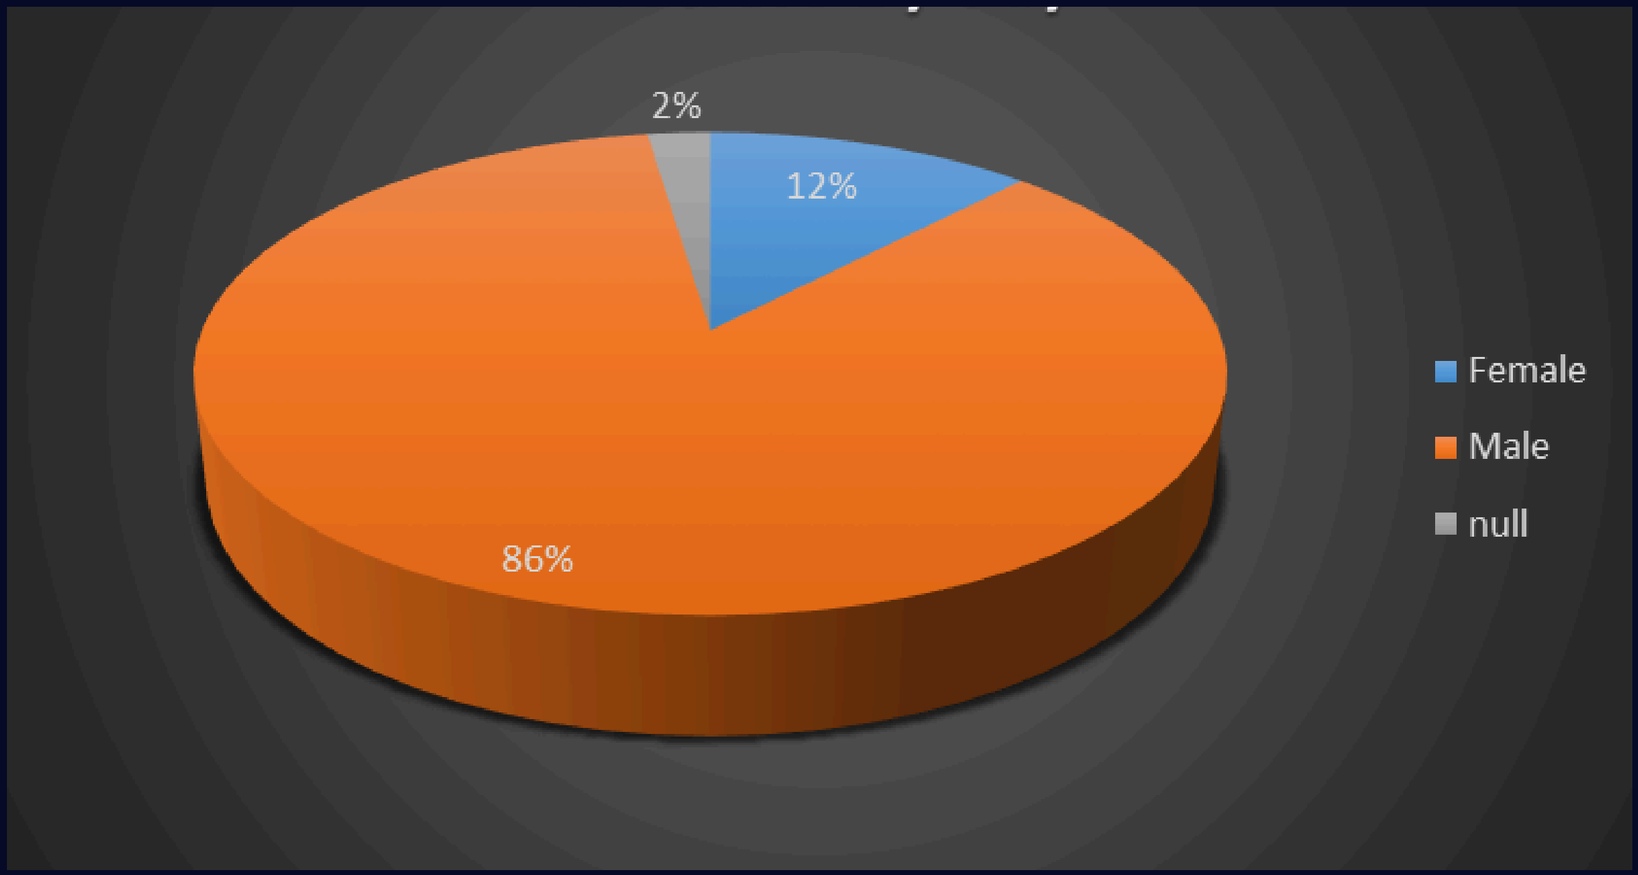
User Segmentation

Insight: A certain % of users drive most consumption (usually true) in each age. The aveage % using each segment shows that 50% of age group between 25-34 engage more then the other age group, followed by youth who are in the age group of 18-24 watching youth content.



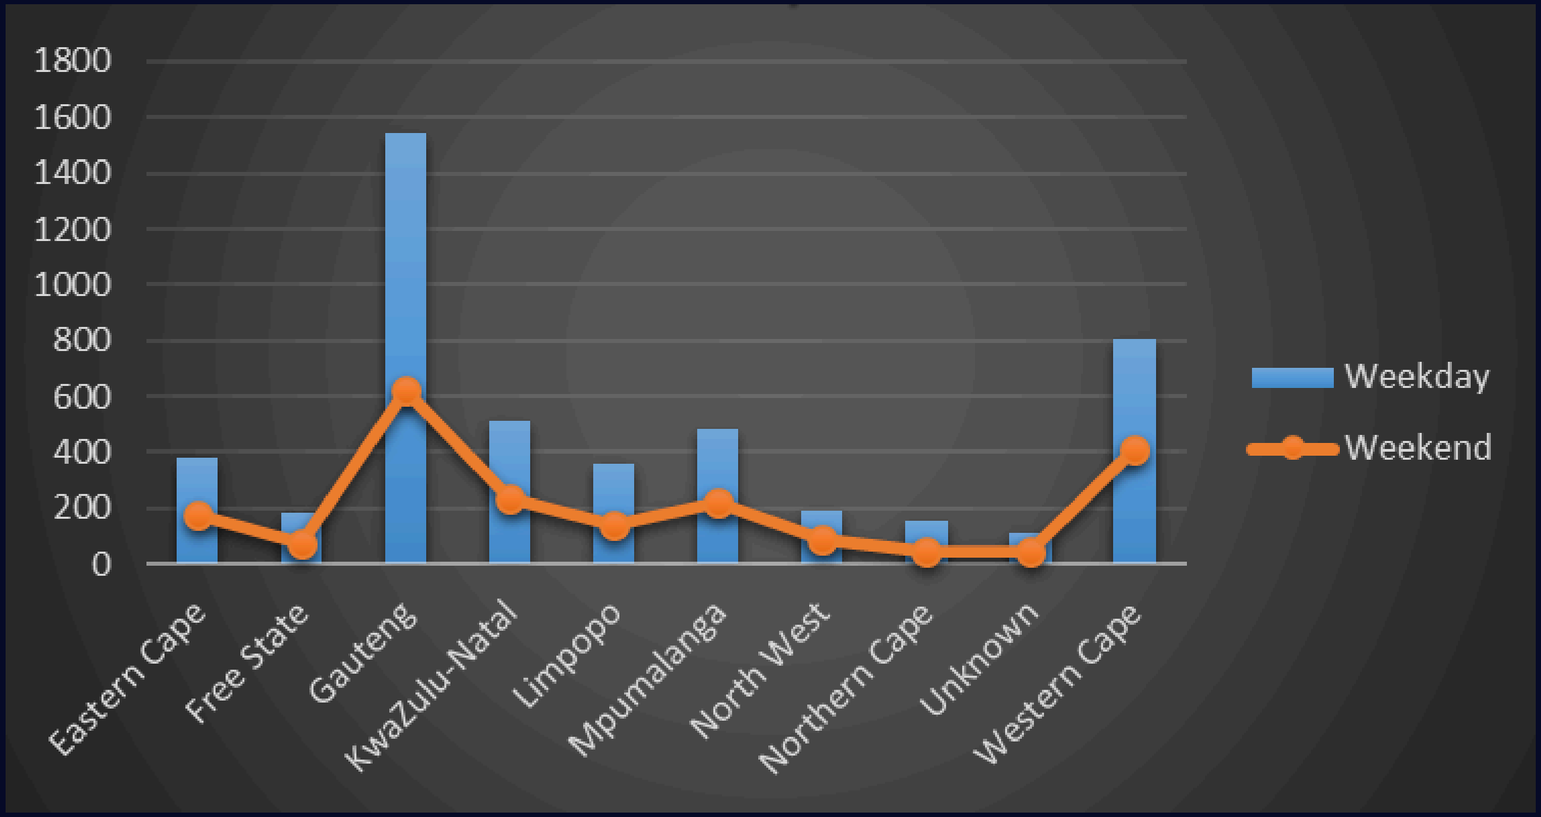
Usage Behavior

Insight: “This pie chart shows that 86% of male more enage more then 12% are female, then the 2% is null. Females enage lesser than male.



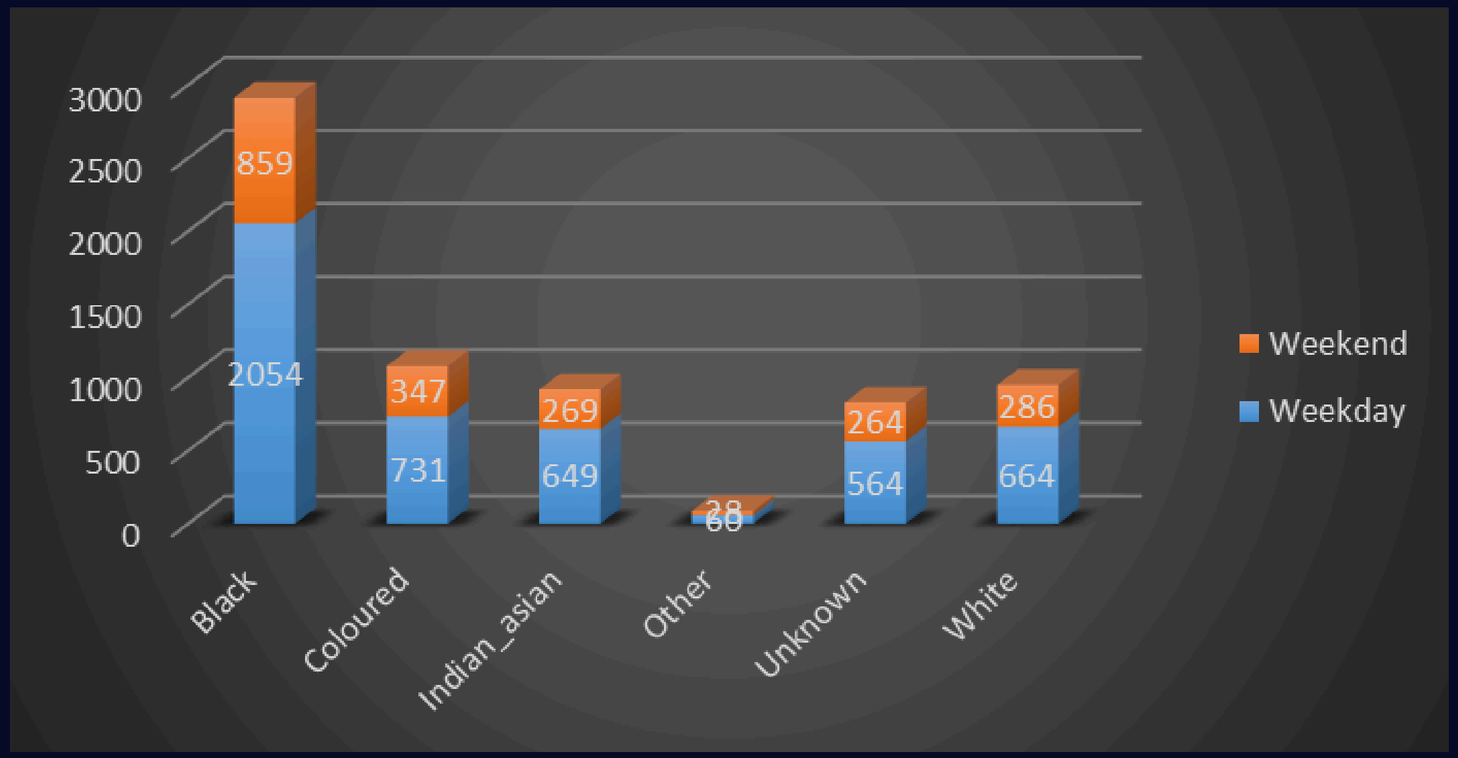
Low Consumption Problem Areas

Insight: "There are less viewer consumption in the North West, Free State, Nothern Cape and Unknown. These are the areas with less engagement in both weekdays and weekends. And these are your biggest opportunities for growth.



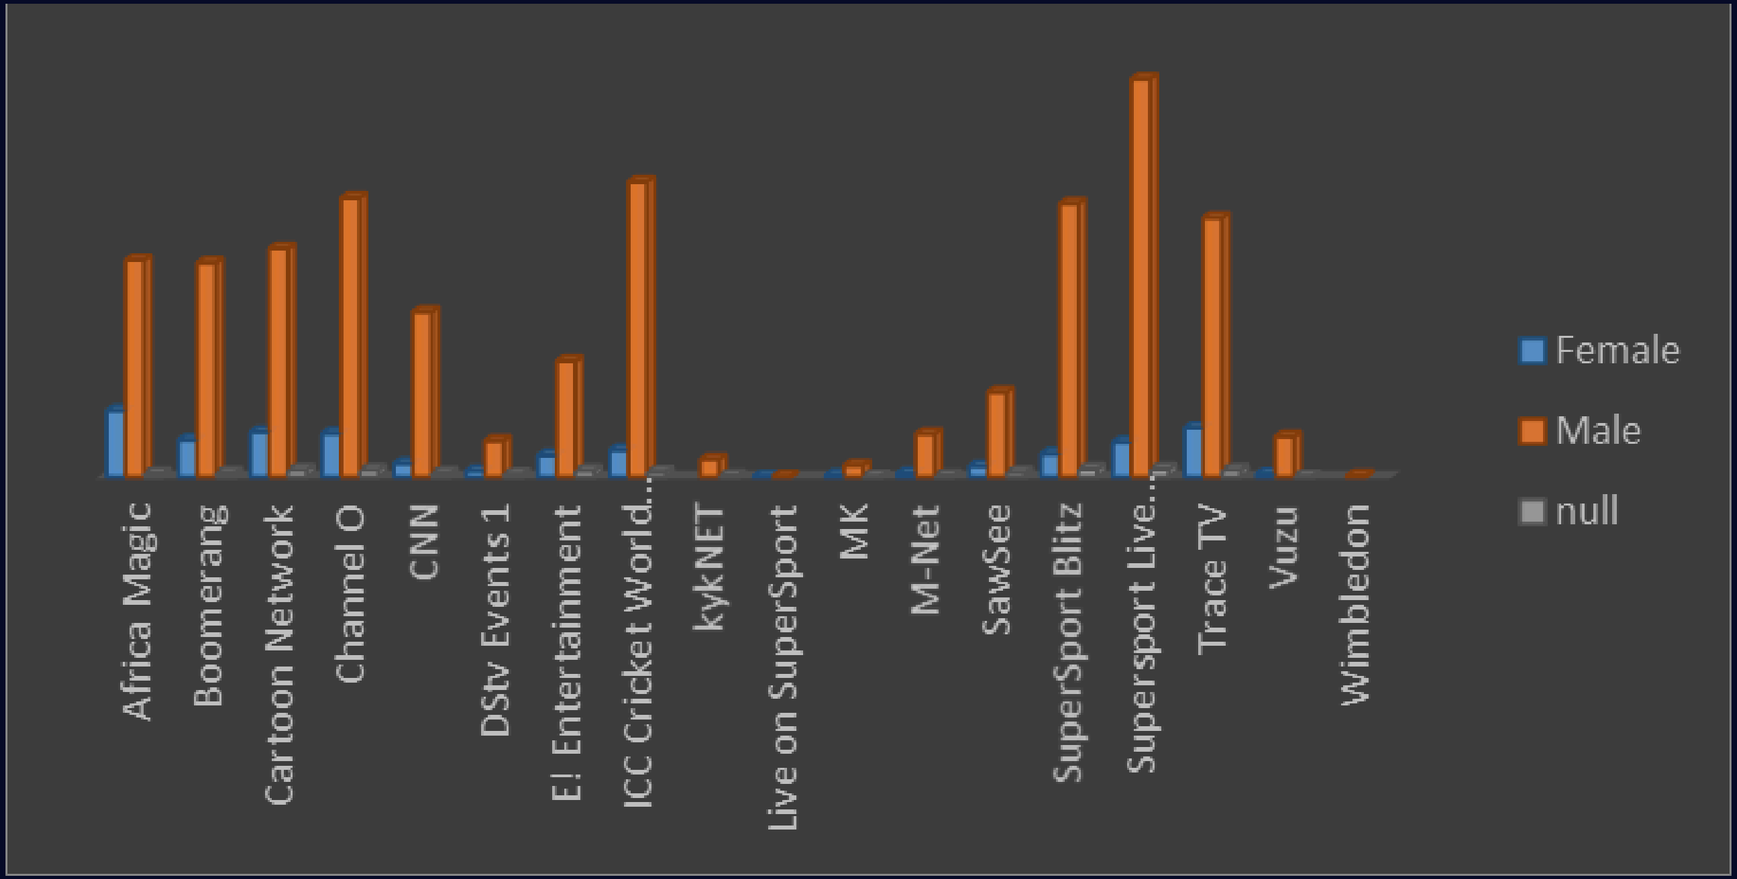
User by Race

Insight: The shows which race is more engaged and which race we need to taget for growth.



Low Consumption Channels

Insight: "Female users enage less then male users. More focus can be placed in the channels that have less engagement."



Bright TV

Increasing Consumption

Recommendations for Low Days:

1. Content Scheduling
Release premium or trending content on low days
Example: “New episode drops on Tuesdays”
2. Push Notifications
“Don’t miss out” reminders during low periods

3. Personalized Recommendations
Suggest content based on past behavior
4. Gamification
Watch streaks, rewards, badges
5. Promotions
Free data hours / discounted streaming windows (very powerful locally)

Bright TV

Growth Strategy for Bright TV

Acquire More Users:

1. Partnerships
Telecom bundles (data + streaming)
Device pre-installs

2. Referral Programs
“Invite a friend, get rewards”

3. Local Content Strategy
Invest in regional / local shows (huge driver in SA markets)

4. Social Media Campaigns
Short clips on TikTok/Instagram/Facebook to drive traffic

Bright TV

Growth Strategy for Bright TV

Retain & Grow Existing Users:

1. Better Onboarding
   - First-day recommendations matter a lot

2. AI Recommendations
   - “Because you watched…” style suggestions

3. Habit Building
   - Daily/weekly shows → create routine viewing

Bright TV

Conclusion

Key Takeaways:

- Consumption is driven by time, content, and user habits
- Biggest opportunity is on low consumption days
- Growth comes from:
  - Better engagement
  - Smarter content strategy
  - Strong acquisition channels
